EDUCATION

Phoenix College of Management

Bachelor in Information Technology

Maitidevi, Kathmandu

Feb. 2021 – May 2024

EXPERIENCE

Jr. Software Developer

Jan 2024 – Present

Codebee Nepal

- Contributed to the development of specialized web-based Booking and Transport Management Systems, catering to Freight Forwarding Companies, Courier Services, Logistics Providers, and Postal Companies
- Worked with Entity Framework using the Database-First approach to design and implement efficient data models, ensuring seamless integration between applications and databases
- Worked with Blazor to build interactive, server-side web applications, gaining hands-on experience in components, data binding, and UI/UX design
- Debugged and optimized C# and .NET applications to enhance performance, resolve bugs, and improve system reliability, using tools like Visual Studio Debugger and logging frameworks
- Developed and maintained software solutions in alignment with provided specifications, ensuring high-quality and efficient code implementation

PROJECTS

KitabKhana | *.NetCore, MsSql, JQuery, Bootstrap*

- Implemented a well-structured n-tier architecture, aligning with Clean Architecture principles, to enhance code organization, scalability, and maintainability
- Utilized Entity Framework for efficient database interactions, authentication management, and role-based access control
- Facilitated seamless payment processing through Stripe integration, allowing users to securely pay for bookings using credit cards
- Integrated an email service to send booking confirmations and notifications, improving user engagement and communication

Movie Booking System | *.Net Core Api, .Net Core MVC, JQuery, Bootstrap, MsSql*

- Developed a system using .NET MVC and .NET API, with the frontend and backend connected via HTTP client for seamless data exchange
- Used session for key user functionalities, including registration, updating user details, and resetting passwords to provide a smooth user experience
- Utilized middleware for token validation, ensuring only authenticated users can access protected resources
- Applied JWT authentication to secure API endpoints and manage access to the booking services

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, HTML/CSS

Frameworks: .NET Core, .NET Framework, ASP.NET MVC 4.5, Blazor, Razor

Developer Tools: Git, Microsoft SQL Server, VS Code, Visual Studio

Libraries: Bootstrap, jQuery
